

CLEARFORD™

Water Managed.™

SERVICES

OPERATIONS

You can rely on our expertise and resources for efficient operation, maintenance and management of treatment, distribution and collection systems. The Clearford team ensures that regulatory requirements are met for safe water and environmental protection.

SITE SERVICES

Our site support team is prepared to respond 24/7 with complete solutions for unexpected situations and planned infrastructure activities including bypasses, dewatering, confined space entry, repairs and construction management.

ENGINEERING

Specialized in decentralized water and wastewater systems and technologies, our engineering and project management team has the experience to navigate regulatory approvals, public consultations, detailed design, construction, and complex troubleshooting challenges.

How We Are Different

Our business is built on decades of experience in the decentralized water industry. Clearford supports all stages of the water infrastructure cycle including project design, construction, finance, equipment supply, and operation of water and wastewater systems. By driving innovation for end-to-end solutions, we ensure that projects are delivered with the right balance of technology, efficiency and affordability.

Commitment

Clearford is dedicated to delivering total solutions for any water infrastructure challenge. From project concept to design, through regulatory approvals and ongoing operations, maintenance and compliance, Clearford is your partner for the successful management of water assets.

Success Story

When the Fetherston Park community near Kemptville, Ontario was faced with closure due to failing onsite communal septic systems, Clearford worked closely with residents and the Municipality to come up with a long-term solution.

Clearford financed, designed, constructed, and is now operating new drinking water and wastewater treatment systems servicing the community for a 30-year term using the innovative Pay-for-Performance (P4P™) project delivery model.

"Clearford One was an affordable solution presented for this project and literally saved Fetherston Park."

Karen Dunlop, Director of Public Works
Municipality of North Grenville
